

# 2020 - 2021 Technology Proficiency Staff Fellowship

anip

## Querying Databases

Participants learned how to query a database, write SQL statements, and filter, sort, and join data bases.

## Cleaning and Manipulating

Participants learned how to insert, print, tables, to extract key findings and perform other media and functions such as vlookup.

Participants learned how to load data in a visualization tool, prepare data for visualization, and demonstrate key findings in pie charts, tables, and graphs.
